

Recording Convention Programs

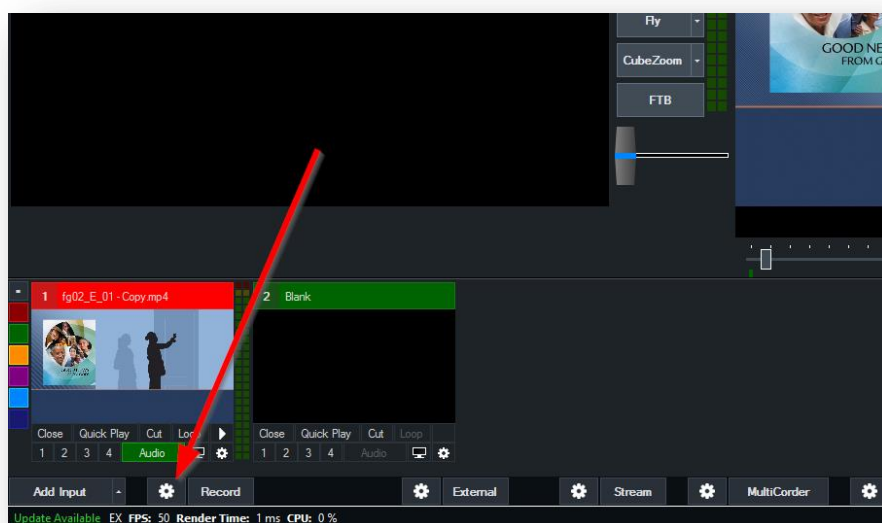

Along with the standalone hard drive recorder, the streaming computer will be used to record the Convention program. Please only record in half day sections (AM and PM). A 3 day convention will result in 6 files.

Open vMix and check the following items:

1. Ensure an input is working – this is what is shown on the in-house displays
2. The input should be on the right side (red bar at top), use the Quick Play button to move input from left (green) to right (red).
3. Ensure there is audio on the output (Green lights moving)
4. Click on the Basic button located at the top of the screen
 - a. More options are now displayed – such as the Record button

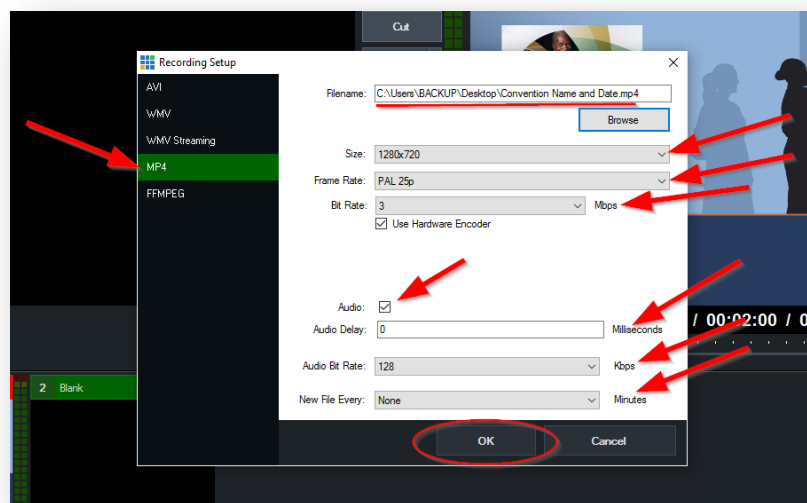

Confirm the recording settings are correct. Click on the Cogwheel icon near the Record button.

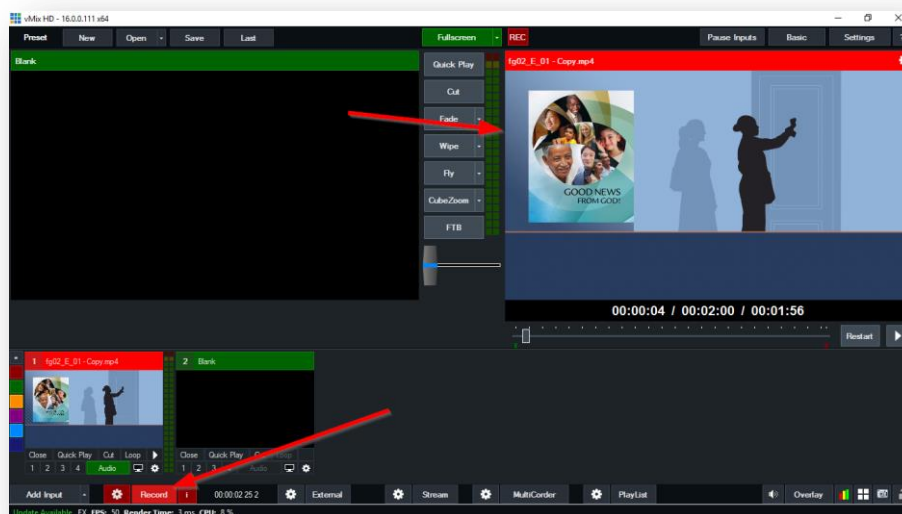

Ensure the following settings are set:

1. MP4 – file type is selected
2. File name and location – browse to Desktop and enter Convention name
3. Size is set to 1280x720
4. Frame Rate need to be PAL 25p
5. Bit Rate is 3 and Use Hardware Encoder is ticked
6. Audio is ticked
7. Audio Delay is 0
8. Audio Bit Rate is 128
9. New File Every is None

Click OK to save settings

The video input needs to be displaying in the right (Live) window. Only what is displayed in the Live window will be recorded. Click on the Record button to start recording. The button will turn red to indicate recording is in progress. To stop recording press the Record button again.

The recorded files will be saved onto your desktop.
