CAR PARK CAPACITY

Please refer to car park layout for the location of each parking zone.

Main Car Park (A) 246
Clevedon Rd Entry Parking (B) 13
Additional Parking (C) 7
Mobility Parking (D) 11
Overflow Parking (F) 101

Additional parking is available on the concreted area to the east of the Residence (Old Wairoa Rd Entry Parking (E) 12 spaces). This area may be used for large vehicles (like buses); however, this would be at the expense of regular parking spaces.

OVERFLOW PARKING

If overflow parking is required, vehicles may be directed onto the grassed area by the main car park (F). Please assess the condition of the grassed area and use discernment when parking vehicles here to minimise the risk of vehicles becoming stuck or damaging the grass.

Please note: The Kingdom Hall car park is not available for use during assemblies or conventions due to local arrangements for meetings and field service.

PARKING EQUIPMENT

Traffic cones and basic signage is available for use in the Parking Kiosk at the south (Clevedon Road) entrance to the Assembly Hall. These may be used to assist with directing of traffic or to restrict access to certain areas. These cones should be returned to the Parking Kiosk at the conclusion of the event.

Two-way radios are available in the Assembly Overseer/Convention Committee Office. Please place these back on charge after use. Only channel 25 can be used due to local air traffic control.

HI-VIZ VESTS

High visibility vests are available and are stored in the closet behind the Lost & Found desk, in the foyer. These vests should be returned at the end of each day.

BADGES

‘Parking’ badges for identification are available under the attendant desk. A parking badge register is provided for badge holders to check in and out. There are a total of 30 parking badges.

MOBILITY PARKING

There are 11 yellow-lined parking bays closest to the Assembly hall which are reserved for those with a mobility parking permit.

RESTRICTED AREAS

Vehicles should not be permitted to park on any grassed areas (except the nominated overflow carpark), nor should vehicles be parked on or block the concrete driveway leading around to the eastern side of the Assembly Hall. This is an accessway for emergency services.

Areas where vehicles should not be parked include:

- ☐ Kingdom Hall car park
- ☐ Driveway of the apartments
- ☐ Outside the maintenance shed
- ☐ Across the residence access
- ☐ In the carport adjacent to the maintenance shed
- ☐ Anywhere on the rear driveway outside the rear gate
- ☐ Grassed areas (except overflow carpark)
- ☐ Driveway and carport to First Aid

OPENING/CLOSING GATES

A key to unlock the main entrance gates (Clevedon Road) will be provided to the Parking Overseer. The main gates should be kept open during events in case an emergency arises. They are manually operated.

The rear gate (Old Wairoa Road) is automated. The Assembly Hall Representative (AHR) is responsible for opening and closing this gate at the request of program oversight. No other person should attempt to open or close this gate due to risk of injury and damage to the gate, motor and components.

SECURITY

It is recommended that both entry gates be monitored at all times **while the gates are open**. This includes during program sessions. If any suspect vehicles or persons enter the grounds, the Attendant Department should be notified immediately.

The Parking Kiosk, located toward the main entrance gates (Clevedon Road) provides a comfortable, sheltered area for volunteers to monitor the carpark and security. This building can be accessed using the key provided to the Parking Overseer. The kiosk also has a live stream feed of the program being presented in the main auditorium.

A live feed of the rear gate (Old Wairoa Road) is available for monitoring from the Attendants Desk in the foyer, inside the Assembly Hall

OFFSITE PARKING

Offsite parking is permitted in the surrounding streets.

Pukeroa Place - residents have previously raised concerns regarding the high number of parked vehicles on the street

Old Wairoa Road - ample kerbside parking

Clevedon Road - busy thoroughfare, not much safe kerbside parking

VEHICLE ARRIVAL

Clear direction from parking attendants is needed to ensure the safe movement of vehicles through the portico and that the elderly and infirmed are directed toward the appropriate parking.

The portico also serves as a pick-up/drop-off zone and, therefore, requires careful traffic control.

Bays in the main car park are designed to be one-way and have traffic move in alternating directions.

Please see Parking Plan for an example of traffic flow through the portico as well as the direction of traffic for the main parking bays.

VEHICLE DEPARTURE

The maximum speed limit of the site is 15 kph, and during the busy departure time it is expected that vehicle speeds would be even slower.

After program sessions, it is recommended to have parking attendants on duty to assist the brothers and sisters to vacate the car park in an orderly manner. The angled parking bays in the main carpark are tight and can present a challenge in reversing out. Vehicles can easily back into each other and this risk can be greatly reduced by the presence of parking attendants.

To help with easing traffic congestion at departure time, both the main and rear gate can be opened. During Friday afternoon peak hours, significant traffic congestion can make it particularly difficult to exit from Old Wairoa Road. Likewise, heavy congestion on Clevedon Road can make exiting and turning right challenging.

PARKING DEPARTMENT

Please complete the tasks list below

PARKING DEPARTMENT END OF DAY

- ☐ Return all parking cones and barriers to Parking Kiosk
- ☐ Remove rubbish from car park
- ☐ Take lost items to Lost & Found

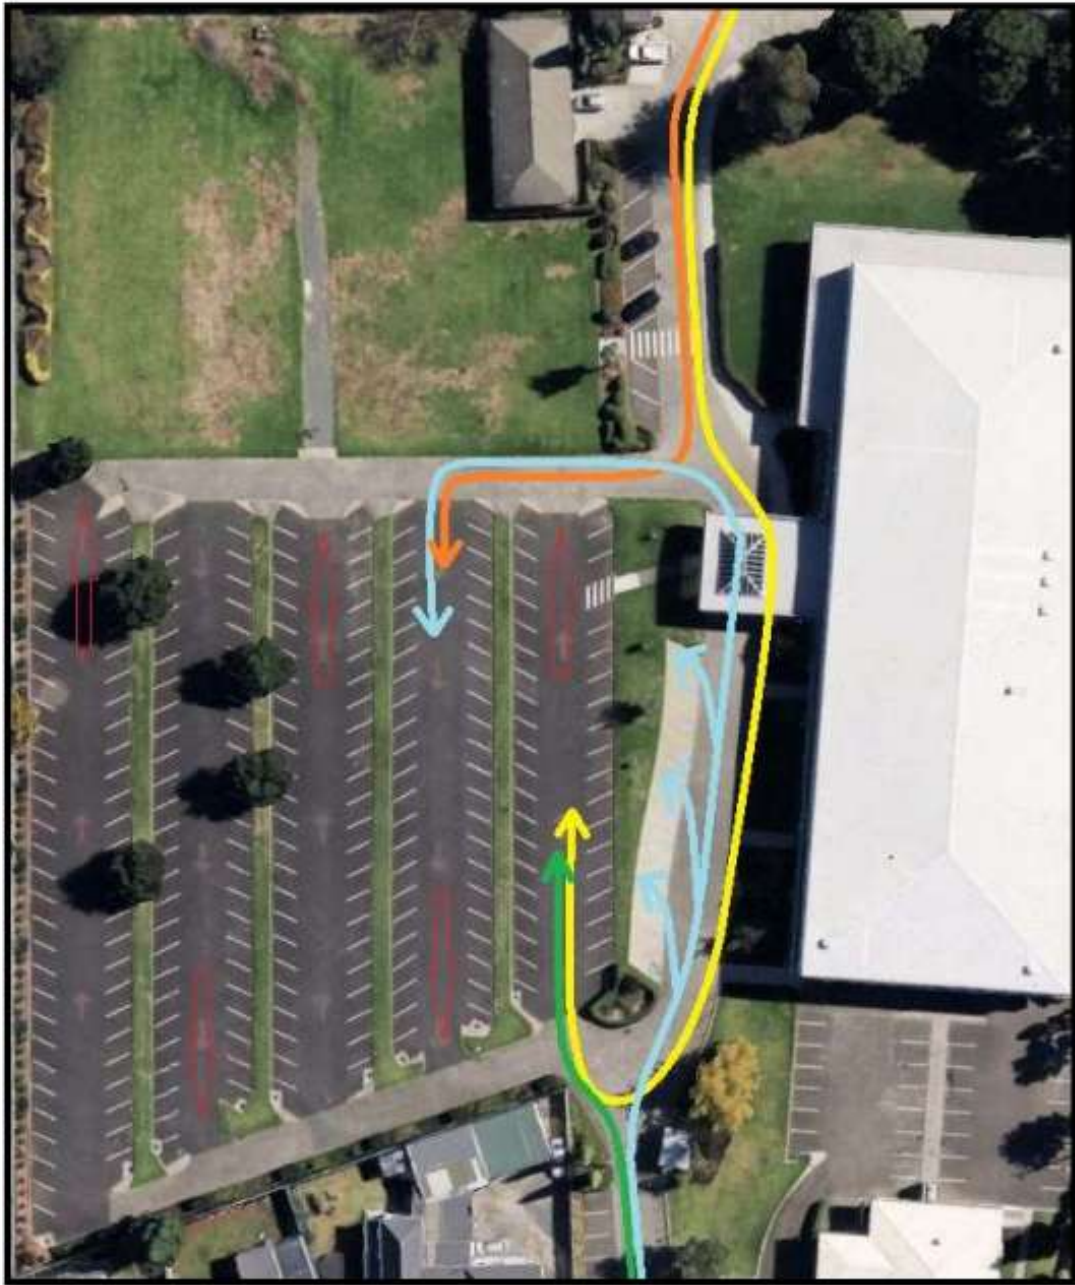

FOYER CLOSET

- ☐ Return and neatly hang all high-viz safety vests in cupboard
- ☐ Return parking badges and complete parking badge register
- ☐ Return two-way radios to Assembly Overseer/Convention Committee Office

PARKING KIOSK

- ☐ Remove all personal items and rubbish
- ☐ Sweep floor of kiosk
- ☐ Wipe desk surfaces with Aquamix #7 and blue microfiber cloth
- ☐ Spot clean glass with blue microfiber cloth and Aquamix #2
- ☐ Close window and lock door
- ☐ Return this checklist to event oversight
